#### **Free or Low Cost Spay and Neuter Surgery**

Spaying or neutering your animal is important for the control of unwanted puppies and kittens. Spaying also prevents mammary gland tumor in females and neutering prevents prostate gland tumor in males. Removing an animal's reproductive organs can also lead to better behavior in male dogs and can prevent spraying by male cats. Maricopa County's Spay Neuter Assistance Program (MC SNAP) provides FREE spay/neuter surgeries for your dog(s) and cat(s) at participating veterinarians throughout the valley. Christown Animal Hospital is a participating veterinarian in the Big Fix program. Learn more at [www.ChristownAnimalHospital.com](http://www.ChristownAnimalHospital.com).
